

JAMES ALBERT MIRA

Frontend Engineer / Full-Stack Software Engineer

Frontend and full-stack engineer with experience since 2018 building web applications and e-commerce platforms. Combines React, Next.js and TypeScript with backend development, API integrations and reusable component architecture.

WORK EXPERIENCE

○ HARVEY NORMAN

Frontend Engineer | 2025 - Present

- Maintain and enhance Shopify theme architecture, integrating APIs with external backend frameworks.
- Develop custom product page features, including variant swatches, product services and warranties.
- Integrate Attraqt and Algolia search into Shopify storefronts to improve product discovery.

○ SYNTACTICS INC.

Full Stack Developer | 2018 - 2025

- Built reusable React and TypeScript UI components to improve consistency and code reuse across projects.
- Developed full-stack Next.js applications with server-side rendering, API routes and optimized routing.
- Designed and maintained React microfrontends with Webpack Module Federation for independent deployment and team scalability.
- Developed Laravel applications using MVC architecture and secure backend logic.
- Integrated Shopify REST and GraphQL APIs for product management, order handling and custom storefront features.
- Built responsive, SEO-optimized WordPress websites and customized WooCommerce and Shopify stores with plugins and third-party integrations.
